JAYELON LASSEIGNE
Software Engineer

Projects

Avocado | GitHub | Live Site | Video Walkthrough | March 2023
- Restaurant POS site where customers can order food and restaurant owners can view/edit their stores and associated data
- Built with React/Redux, Supabase, Tailwind CSS, Node.js, and Plotly
- Worked as the project manager, leading daily standups and making sure the project was on track. Headed up styling of Avocado as well

The Broken Egg | GitHub | Live Site | February 2023
- Built with React/Redux, TypeScript, Tailwind CSS, and the Spoonacular API
- Worked as the sole-developer, manipulating state across multiple components and developing a theme and styling
- Users can search recipes from the API and can click on them for more information, such as ingredients and how to make it

Experience

Teacher's Assistant
DigitalCrafts, Remote
April 2023 to Current
- Perform tasks such as taking attendance and checking homework for a full-stack software development course
- Aid budding developers by answering questions and providing feedback
- Anticipate problem areas for students and prepare examples and resources

Contributor
Open Library
March 2023 to Current
- Open Library is a book cataloging site, where the goal is to make a web page for every book ever published
- Attend weekly meetings for developers to provide updates, explain any blockers, and discuss ongoing projects related to the website
- Currently refactoring Open Library's team page based on Figma mockups

Assistant Language Teacher
JET Programme, Nagano, Japan
July 2017 to July 2022 (5 years)
- Built and maintained a curriculum for 6th grade English for four years
- Gave engaging lessons on English grammar and vocabulary, as well as cultural lessons designed to introduce students to different countries
- Tutored one to two students daily before or after school in English conversation
